

PYLOU

KARABIT

IT PRODUCES SMOKE THANKS
TO THE CLEAROMIZER!

An SK6812 Mini LED
paired with an acrylic
light pipe for dynamic
blade effects!

A High-discharge fpv-
drone LiPo battery to
deliver enough current

A Reaver Wood inspired stand with magnet to
detect when the Karambit is placed on!

The brain: a Xiao
NRF52840 sense
with an IMU,
charge circuit and
even microphone
integrated for voice
activation!

The pcb combined with transistors and
resistors to make the board able to
control components without frying
